

**NEW  
PRODUCT**

BEAUTY N HEALTH  
The supra and perio double effect

**air N GO**

The first  
dual purpose  
AIR POLISHER

**SUPRA version**

The Beauty: for perfect cosmetic results thanks to a fast, effective and painless polishing that is gentle to the gingiva and teeth.

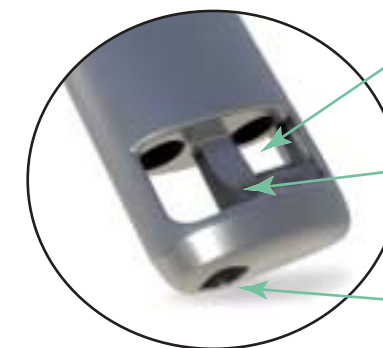

**PERIO version**

The Health: for a simple and efficient way to treat periodontal diseases and peri-implantitis subgingivally.

**PERIO nozzle**

The PERIO nozzle is a technological advancement which possesses the unique properties of the mixture chamber which ensures the formation of a powerful and ultra-efficient spray to remove bacteria.

Air, water and "PERIO" powder mixture chamber for a regular and constant spray.

Spray side deflector for a targeted cleaning action on the periodontal pockets.

"STOP POWDER" exit: for an air-water syringe action on demand.

Natural Flavor  
**TASTE  
THE  
DIFFERENCE**

The Air-n-Go® Perio Kit can be added at anytime to expand your treatment capabilities.

Treat periodontitis or peri-implantitis in just 20 Seconds!  
\* Protocol cases available on request or at [www.airngoconcept.com](http://www.airngoconcept.com)

- The AIR-N-GO® handpiece allows easy access to all areas of the mouth including difficult to reach, posterior areas due to its light weight and its 360° rotation.
- The handpiece also features a non-slip silicone ring that allows you to maintain a firm grip even with wet gloves, reducing the risk of dropping.
- Two different sized, exchangeable heads are available to make the handpiece short or long depending on the size of the clinician's hands for superior ergonomics and comfort.
- With the push of a button on the back of the powder tank, the "STOP POWDER" function of the AIR-N-GO® transforms the air polisher into an air-water syringe which allows you to rinse the patient's mouth after treatment and saves you time!
