

Autoclavable LEDs Progressive Pedal Controlled Power

The Choice Is Yours...

"The Intralift attachments that accompany Acteon's PIEZOTOME2 unit provide a quick, simple and predictable alternative to sinus grafting. The technology allows the clinician to effectively lift the sinus membrane with a reduced risk of perforation."

- Ara Nazarian DDS.
Private Practice: Troy, MI with an emphasis on comprehensive and restorative care, Clinical Consultant for the Dental Advisor and Dental Compare, creator of the DemoDent patient education model system.

"The PIEZOTOME2 adds the element of finesse to surgical implantology. Designed to deliver the safety margin to procedures where preservation of vital structures is paramount, this unit has made its mark on sinus lifts and bone grafts - the essentials in today's implant protocols."

- John S. Cavallaro, Jr. DDS.
Private Practice: Brooklyn, NY, Clinical Associate Professor at the College of Dental Medicine Columbia University

"I have been a huge fan of the Implant Center2. Never would I have believed that the second rendition would be that much more amazing! ACTEON has added some awesome features like the LED light, the touch screen panel and a vastly improved foot-pedal. This is truly a workhorse item in my practice that is used on a daily basis, making my patient care go quite smoothly! ACTEON has really come up with a gem that will enhance patient outcomes with implants, extractions, lateral ridge expansion, lateral window and internal sinus elevations, crown lengthening and autogenous bone procurement"

- Paul S. Rosen, DMD, MS
Private Practice: Yardley, PA, Clinical Associate Professor of Periodontics, Baltimore College of Dental Surgery, University of Maryland

"Piezoelectric technology is the real deal! From everyday surgical extractions to maxillary sinus elevation surgery, piezoelectric surgery allows for complication-free results every time. The IMPLANT CENTER2, combining a piezoelectric hand piece with an implant motor system, is my workhorse for everyday practice."

- Stephen S. Wallace, DDS.
Private Practice: Waterbury, CT, fellow of the AAO, diplomat of the ICOI, Associate Clinical Professor at the College of Dental Medicine Columbia University

35% faster*

SIX CERAMIC RINGS

- More powerful
- No energy loss
- No overheating

* Average time on 10 incisions (1cm long and 3mm deep).

3x's THE POWER!

PIEZOTOME2 and IMPLANT CENTER2 ...

- Three times more power than PIEZOTOME1! (60 watts vs 18 watts of output power in the handpiece)
- Procedures are faster than ever, giving you a clean and effortless cut
- NEWTRON LED and PIEZOTOME2 LED Handpieces output 100,000 LUX!
- Extremely precise irrigation flow to avoid any risk of bone necrosis
- Selective cut: preservation of soft tissue (nerves, membranes, arteries)
- Less traumatic treatment: reduces bone loss and less bleeding
- 1st EVER Autoclavable LED Surgical Ultrasonic Handpieces
- Giant user-friendly 5.7" color touch-control screen
- Ultra-sharp, robust and resistant tips (30+ Surgical & 80+ Conventional)
