**air N GO**  
Powder

### ACTEON, North America releases new AIR-N-GO® range of air polishing powders

ACTEON, North America (Mt laurel, NJ) has introduced the first range of powders to focus on the patient's well-being. The new **AIR-N-GO powders**, created by SATELEC, were designed to provide gentle care and effective prophylaxis or sub gingival treatments. The grain structure of each type of powder was specifically chosen to give an efficient and painless polishing and cleaning, which causes no damage to the tooth or implant.

This range is available in seven different powders.

- **AIR-N-GO "CLASSIC"**, sodium bicarbonate based powder, with less aggressive geometry, comes in five 100% natural fresh flavors including peppermint, lemon, raspberry, cola, and neutral.
- **AIR-N-GO "PEARL"**, based on natural calcium carbonate, consists of microspheres that are gentle on delicate tissues.
- **AIR-N-GO "PERIO"** the glycine-based powder will help you to prevent and fight periodontal and peri-implantitis diseases sub gingivally.  
Please contact your local dealer or ACTEON for more information.

### About ACTEON
