Mini LED
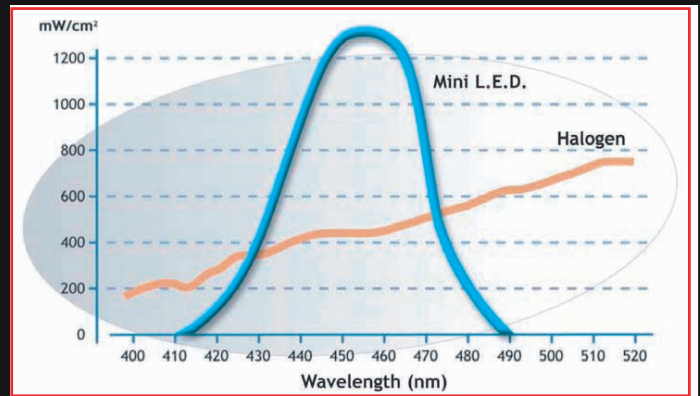

BLACK

Autoclavable Multi-fibered opalescent glass light guide

- Simple and Efficient
- First curing light with disposable batteries
 - No cord or charger needed
 - Handy and precise (pen style design)

Powered by
3 "AA" Batteries!

Light Shield also functions as a stand to prevent "Roll offs"

Anodized aluminum handpiece has rounded surface for easy and comfortable handling. With no fan, there is less risk of cross contamination

Mini LED
BLACK

Technical Specifications

Mini LED Black	F05400
Dimensions (without light guide):	
Weight	4.76oz / 135g (without batteries)
Dimensions98" / Ø25 x 8.26" / 210mm
Medical category	Class I
Operation	Continuous operation
Batteries (included)	
Type	AA
Quantity	3
Optical specifications:	
LED for polymerization:	
Wavelength range	420 - 480 nm
Peak wavelength	455 - 465 nm
Intensity	1250mW/cm ² ± 10% with light guide
Light Guide	Ø7,5mm (Ø active 6.8mm)
Accessories :	
Opalescent light guide Ø 7.5 mm	F05409
Flexible protective shield x 5 (option)	F61507
Rigid protection shield	F05407
